

## AI &amp; AUTOMATION

# Turn hours of admin into **minutes** — the AI does the admin, not the deciding.

We wire AI into the systems you already use. Messy inputs in — quotes, invoices, forms, emails — structured outputs out, with a person's tick before anything sends or acts. AU-hosted by default, and reviewable end to end.

## THE PROBLEM

The same repetitive tasks eat hours every week: reading, sorting, re-keying, cross-referencing. It's mostly pattern-matching, not judgement — but it still has to be done, and it still gets done by a person.

## HOW THE ENGAGEMENT WORKS

- **Discover**  
We shadow the real work and cost the highest-impact automations.
- **Multi-workflow systems**  
Linked workflows sharing one review queue.
- **AU-resident by default**  
Overridable only per workflow, on a consent record you sign.
- **Single-workflow build**  
One recurring task, done end-to-end.
- **Human review, always**  
Nothing sends or acts on an unchecked pass.
- **Fixed-price packs**  
Pre-scoped starting points, no discovery fee.

DISCOVER <b>\$4,500</b> credited to Build	BUILD <b>\$15k–\$80k</b> fixed-price	RUN <b>from \$750</b> /mo
--	---	------------------------------

**Not a chatbot, not slideware.** We build workflows tailored to your business, priced up front. Fixed-price packs from \$3,500 skip the discovery fee entirely.

**Tell us your biggest time-suck.**

A free 30-minute call to find what's automatable — and what honestly isn't.
