

FIXED-PRICE AI PACK · NO DISCOVERY FEE

Know what's safe to automate — before you build anything.

A written, plain-English assessment of what's safe to automate, what isn't, where your data would go, and the documentation an insurer or auditor will ask for. An assessment, not a build — and one your reviewer will actually accept.

THE PROBLEM

You know AI could help, but you can't move until you know it won't put client data or your compliance position at risk. For professional services, allied health and bookkeeping, that sign-off has to happen before any build — not after.

WHAT YOU GET

- **Written readiness report**
What's a good automation candidate, what isn't, and the honest reasons.
- **Ranked automation candidates**
The work most worth automating, ranked, with rough effort bands.
- **Written for both readers**
A non-technical owner and a technical reviewer both get what they need.
- **Data-handling map**
Where your data lives, what leaves, and what touches an AI model.
- **Governance starter**
The paper trail that makes an AI engagement defensible.
- **Regime-aware**
Named to your regime — Privacy Act, APRA, AHPRA, ATO or NDIS.

PRICE

\$3,500 fixed-price

SHIPS IN

1–2 weeks

CREDITED

to any Build within 60 days

Not included: any build work (the report becomes the scope for a fixed quote); a formal legal or regulatory opinion (sign-off stays with your advisers); penetration testing or a security audit.

Book it from a free 30-minute call.

\$3,500 comes off any AI pack or Build you start within 60 days.
