

WEBSITE ADD-ON · AI CONTENT ENGINE

A blog that **writes its first draft** — you keep the final word.

A fortnightly publishing loop that drafts posts in your brand voice from a topic queue you control, and publishes to your blog on your approval. The same loop that runs this site.

THE PROBLEM

A blog is good for being found — but keeping it fed becomes a second job you never get to. So it sits stale, and the search benefit never arrives.

WHAT YOU GET

- **Fortnightly content loop**
An agent drafts a post in your brand voice on schedule.
- **Findable insights section**
Schema-driven, with auto preview images per post.
- **Handed over as yours**
The loop, the queue and the content — no lock-in.
- **Topic queue you control**
Add, reorder or drop topics whenever you like.
- **Publish only on your approval**
Each draft waits for your tick.
- **Pairs with the Social Engine**
Buy both and each social tier is \$2,000 cheaper.

Authority Site

You keep the final call: nothing publishes until you approve it. The loop drafts; you decide what goes live.

Keep publishing without the second job.

Book a free 30-minute call and we'll set the loop up in your voice.
