

DELIVERY SERVICE · FIXED-PRICE

Your site, live on **Australian hosting you own.**

Prefer to host on your own Australian account instead of ours? We deploy your Neurastruct build onto VentrailP shared hosting or a private server, set up to the same security standard, with the domain and account staying in your name. One setup fee for the work — the hosting stays yours, with no reseller markup.

WHO IT'S FOR

Businesses that want a single Australian vendor for domain, hosting and email, a predictable flat hosting bill, or their own dedicated server — and anyone moving an existing site onto hosting they control.

WHAT WE DO

- **Deploy to your hosting**
Static, application, or a private server — whichever your site needs.
- **Same security standard**
Headers, spam-protected forms and our full baseline, on your host.
- **Clean handover**
A day-one exit pack so nothing of yours is ever locked in.
- **Domain, DNS and HTTPS**
Pointed correctly, with the security padlock set up and auto-renewing.
- **Your account, your name**
We're a delegated helper — no markup, no renewal commission.
- **Move an existing site**
Migration onto your hosting, quoted on top.

STATIC DEPLOY

\$750 from

APPLICATION

\$1,500 from

PRIVATE SERVER

\$2,500 from

Good to know: a fresh build already includes hosting on our fast AU service — this is for hosting on your own account. Keeping it healthy afterwards is Operate & Run. Our AI tools and custom software run on specialised AU cloud, not shared hosting, and we join the two together.

Want your site on hosting you own?

Book a free 30-minute call and we'll pick the right setup with you.
