

FIXED-PRICE AI PACK · SCOPED PER CASE

Bought an AI tool that stalled? We'll audit it and fix it.

We audit what you've got, put a fixed price on the fix, then repair or rebuild the piece that matters — and hand it back as yours. You approve the number before any remediation starts.

THE PROBLEM

Someone sold you an automation and it didn't stick. It half-works, it broke after an update, or it never went live at all — and now no one's sure what it does or whether it's safe to keep running. You've paid for it once and don't want to write it off.

WHAT YOU GET

- **Diagnostic of what you have**
A plain-English picture of what's running and where it fails.
- **Fix the piece that matters**
Human-reviewed, AU-hosted, with an audit trail.
- **You approve first**
Nothing is remediated until you sign off the fixed price.
- **Fixed-price remediation plan**
What we'd repair, rebuild, or retire — with the number against it.
- **Handed over as yours**
The working piece and its source — no per-seat licence, no lock-in.
- **Straight answers**
If a piece is cheaper to rebuild than repair, we say so.

PRICE from \$4,500 fixed, per case	SHIPS IN 2-3 weeks	YOU OWN IT Source + all
--	------------------------------	-----------------------------------

Not included: a promise to save any specific tool; third-party licence or hosting costs (they stay with your provider, never marked up); forcing a non-cooperating vendor to release access (we tell you before you commit).

Let's look at what you've got.

Book a free 30-minute call — the diagnostic sets the fixed price for the fix.
