

WEBSITE ADD-ON · TWO TIERS

Your socials, drafted and posted — **on your approval.**

An automated social loop wired into your site. It drafts posts in your brand voice from a queue you control and publishes on your tick. Add the inbound tier and incoming DMs and comments get read, sorted, and drafted for you too.

THE PROBLEM

Posting consistently is a grind, and replying to every DM and comment eats the day. Left alone, the channel goes quiet — or someone burns hours minding the feed.

TWO TIERS

- **Tier 1 · Content + Posting**
Drafts in your voice from your queue, publishes on your approval.
- **Branded profiles set up**
Your platforms branded consistently with the site.
- **Sensitive cases escalate**
An unhappy customer or a real lead comes to you, not a bot.
- **Tier 2 · adds Inbound**
DMs and comments read, sorted, and drafted for your approval.
- **You approve, then it posts**
A tick via SMS or Slack — or auto-post a trusted category.
- **Handed over as yours**
The loop, queue and accounts are yours — no lock-in.

TIER 1 · POSTING

+\$4,500 add-on

TIER 2 · + INBOUND

+\$7,500 add-on

WITH BLOG ENGINE

\$2,000 cheaper each

You keep the final call: nothing posts or sends on an unchecked pass unless you choose to let a trusted category through.

Keep your socials moving.

Book a free 30-minute call and we'll pick the right tier.
